

How is the market situation of capacitors

What is the future of the capacitor market?

Publisher: Lucintel Publication date: Get it in 2 weeks by ordering today. The future of the capacitor market looks promising with opportunities in the computer, telecom, consumer electronics, automotive, and industrial sectors. The global capacitor market is forecast to reach \$31.2 billion by 2027 with a CAGR of 5.9% from 2021 to 2027.

What is the capacitor market size in 2024?

The Capacitor Market size is estimated at USD 25.21 billion in 2024, and is expected to reach USD 33.57 billion by 2029, growing at a CAGR of 5.90% during the forecast period (2024-2029).

How big is the capacitor market?

The global capacitor market is forecast to reach \$31.2 billion by 2027 with a CAGR of 5.9% from 2021 to 2027. The major drivers for this market are increasing demand for consumer electronics products, growing demand for premium smartphones, and increasing production of electric vehicles.

Why is the capacitor market growing?

The capacitor market is poised for significant growth, driven by advancements in technology and increasing demand across various sectors. The miniaturization of PCBs and advancements in semiconductor and circuit architectures have spurred the demand for capacitors, particularly in applications like smartphones and communication base stations.

How competitive is the capacitor market?

The market is competitive with the presence of various large-scale manufacturers in the market across the globe. The capacitor market has long-standing established players who have made significant investments. These companies leverage strategic collaborative initiatives to increase their market share and profitability.

What are the key drivers and restrictions affecting the capacitor market?

Here are some key drivers and restrictions affecting the Capacitor market: Electronics Industry: The rapid growth of the electronics industry, including smartphones, computers, and consumer electronics, drives the demand for capacitors used in electronic circuits.

Silicon Capacitors Market size was valued at US\$ 1,673.2 million in 2022 and is expected to grow at a CAGR of 5.5% from 2023-2029. Silicon capacitors are referred to as the fundamental ...

Market Overview: The report provides a comprehensive overview of the Capacitors market, including its definition, historical development, and current market size. It covers market ...

The Supercapacitors Market is projected to register a CAGR of 11.14% during the forecast period

How is the market situation of capacitors

(2024-2029) Reports. Aerospace & Defense; ... compared to frequently used hybrid-layer ...

The global market for Capacitor was estimated to be worth US\$ 23990 million in 2023 and is forecast to a readjusted size of US\$ 29600 million by 2030 with a CAGR of 3.1% ...

Capacitors Market by Capacitor Type, Voltage Range, Application, Material, End-User Industry, Dielectric Material, Configuration - Global Forecast 2025-2030

Based on current situation and impact historical analysis (2019-2023) and forecast calculations (2024-2030), this report provides a comprehensive analysis of the global ...

The Capacitor Market size is expected to reach USD 25.21 billion in 2024 and grow at a CAGR of 5.90% to reach USD 33.57 billion by 2029.

Based on historical analysis (2019-2023) and forecast calculations (2024-2030), this report provides a comprehensive analysis of the global Capacitor market, including market ...

The global market for silicon capacitors attained a volume of around 2,300.57 million units in 2023. The market is further expected to grow at a CAGR of 5% in the forecast period of 2024-2032 to reach a volume of nearly 3,555.08 million ...

An aluminum electrolytic capacitor, usually simply called an electrolytic capacitor (e-cap), is a capacitor whose anode (+) consists of pure aluminum foil with an etched surface, ...

This research report provides a comprehensive analysis of the Capacitor market, focusing on the current trends, market dynamics, and future prospects. The report explores ...

This research report provides a comprehensive analysis of the Capacitors market, focusing on the current trends, market dynamics, and future prospects. The report ...

The Super capacitors or EDLCs (i.e. electric double-layer capacitors) or ultra-capacitors are becoming increasingly popular as alternatives for the conventional and ...

A capacitor consists of two metal plates and an insulating material known as a dielectric pending on the type of dielectric material and the construction, various types of capacitors are available in the market.. Note: ...

This market report covers trends, opportunities and forecast in the global capacitor market to 2030 by end use industry (telecom, computers, consumer electronics, automotive, industrial, and ...

In capacitors, my theory of price growth is quite well traced. 10-15% growth is an increase in producer prices. The rest is the price increase due to the change of supply ...
