Is home solar power worth it

Are solar panels worth it?

Depending on your household's annual electricity usage,pairing a solar system with a solar battery may be worth it. This is because,with solar panels,you can only use the energy they generate immediately. With solar batteries,on the other hand,you can store surplus electricity to use when it's dark out or if there's a power outage.

Is going solar worth it?

Well,the answer is yes. Going solar is worth it because you can expect significant savings on your yearly electricity bills (up to £1,005) and cut your carbon footprint by almost a tonne in pollution for the average solar panel system.
