

Nassau Solar Panel Acquisition

Who is Bahamas solar?

At Bahamas Solar we take care of your project from start to finish. Offering full turnkey systems for all residential and commercial operations. Serving all The Bahamas, from Nassau to the out islands. We offer customized solutions tailored to your specific needs. The first step to going solar is a site assessment.

Who is island solar?

Island Solar is based in Nassau, Bahamas and is committed to installing safe, high quality, code compliant and long lasting solar electric (photovoltaic) systems in the Bahamas and across the Caribbean. We specialize in commercial systems from 50 kW to multi-megawatt utility scale systems.

What is a solar energy microgrid in the Bahamas?

This initiative involves developing solar energy microgrids across the Family Islands. This also encompasses the Government's goal of The Bahamas having a 30 per cent renewable power generation by the year 2030.

Will the Bahamas have a 30 per cent renewable power generation?

This also encompasses the Government's goal of The Bahamas having a 30 per cent renewable power generation by the year 2030. The Minister explained that microgrids will ensure consistent and reliable power output for island inhabitants, addressing unique island requirements.

What is net metering in the Bahamas?

This will introduce net-metering, which is the recording of energy flows in both directions. As the Bahamas has close to six daily peak sun hours. Solar Power can offset a significant part of your power bill. Our goal is to design and build systems that can achieve maximum independence from the ever increasing cost of power.

Is the Bahamas ready for a sustainable future?

The Prime Minister said the choice The Bahamas faces is stark. "Continue down a path of expensive, unreliable energy or pivot towards a future where energy is sustainable, affordable and secure." He noted that this Government administration's number one focus is reducing the cost of living for every Bahamian.
