Why does Windows not detect my laptop's battery?

Battery drivers on your PC help Windows connect and communicate with your laptop's battery. However, if those drivers aren't functioning properly, Windows may fail to detect your laptop's battery. Here's what you can do to fix that. Step 1: Right-click on the Start icon and select Device Manager from the list.

Why is my laptop not charging?

By carefully checking and properly securing the AC charger connections and battery, you can eliminate the most common cause of a laptop not charging. 1. Turn off your laptop and disconnect the AC Power Charger from the wall and your laptop. 2. Ensure that you're using the original AC Power Charger for your laptop.
