No battery usage when plugged in

Why does Windows not detect my laptop's battery?

Battery drivers on your PC help Windows connect and communicate with your laptop's battery. However,if those drivers aren't functioning properly,Windows may fail to detect your laptop's battery. Here's what you can do to fix that. Step 1: Right-click on the Start icon and select Device Manager from the list.

Why is my laptop not charging?

By carefully checking and properly securing the AC charger connections and battery, you can eliminate the most common cause of a laptop not charging. 1. Turn off your laptop and disconnect the AC Power Charger from the wallet and your laptop. 2. Ensure that you're using the original AC Power Charger for your laptop.

How to fix battery not charging problem Windows 10?

To see if Windows can fix the battery not charging problem,you can run the power troubleshooter. 1. In the search type "troubleshoot settings " and then click to open them from the search results. 2. In the 'Troubleshoot' window,select Additional troubleshooters. 3. Scroll down and click on Power.

What if my laptop has a removable battery?

If your laptop has a removable battery,try removing it and inserting it back. Try updating or reinstalling the battery adapter to see if that gets Windows to detect the battery. You may have to reset the BIOS settings on your laptop if nothing else works. You can start by removing your laptop's battery if possible and installing it again.

How do I Fix my laptop battery not charging?

To troubleshoot and diagnose the battery not charging problem on your laptop follow the below steps in order: Check Power Supply connections & Battery. Check Power Cable & Battery Connection. Disconnect External Devices. Diagnose Battery Health. Run Windows Battery Troubleshooter. Uninstall & Reinstall Battery Device Driver. Update Chipset Drivers.

Why does Windows 11 say no battery is detected?

If the error remains,it could be caused by a corrupted battery driver. In that case,you can try uninstalling the driver instead. Restart your PC after that to allow Windows to install the removed driver again. At times,issues with your PC's BIOS can also lead to the "No battery is detected" message on Windows 11.
