Sikaflex solar panel adhesive will withstand the most extreme weather conditions. Each tube contains enough adhesive to secure any of our semi-flexible solar panels and most of our marine solar panels. One tube is also enough to glue one set of corner mounts, one pair of short-side mounts and one roof connection gland to your motorhome roof.

How to seal between solar panels using a silicone sealant?

Below is a step-by-step procedure of how to seal between solar panels using a silicone sealant: Clean the surface to get rid of tape or any other material before starting the sealing process. Add the silicone sealant at the point where the glass meets with the frame or whichever edge protection is present.

How do you seal a solar panel?

Make sure the surface is clean and free of any tape or other materials before applying silicone sealant to seal solar panels. Add some silicone at the corner of the glass where it meets with the frame or any other added edge protection. Make sure that you do not apply too much silicone since it will overflow after installing the panel back.
